

What is a local Green Space?

The Steering Group is required to follow the National Planning Policy Framework, which states:

“Paragraph 76. Local communities through local and neighbourhood plans should be able to identify for special protection green areas of particular importance to them. By designating land as Local Green Space local communities will be able to rule out new development other than in very special circumstances. Identifying land as Local Green Space should therefore be consistent with the local planning of sustainable development and complement investment in sufficient homes, jobs and other essential services. Local Green Spaces should only be designated when a plan is prepared or reviewed, and be capable of enduring beyond the end of the plan period.”

What criteria must be met?

The above Planning Framework states:

“Paragraph 77. The Local Green Space designation will not be appropriate for most green areas or open space. The designation should only be used:

- *where the green space is in reasonably close proximity to the community it serves;*
- *where the green area is demonstrably special to a local community and holds a particular local significance, for example because of its*
 - *beauty,*
 - *historic significance,*
 - *recreational value (including as a playing field),*
 - *tranquillity or*
 - *richness of its wildlife; and*
- *where the green area concerned is local in character and is not an extensive tract of land.*

78. Local policy for managing development within a Local Green Space should be consistent with policy for Green Belts.”
